**“Don’t Be a Victim: Stop Cyberattacks in Their Tracks” –
A Tech Up for Women Webinar Featuring Team NIKSUN**

Princeton, NJ, April 8, 2024 – Tech Up For Women is a collaborative hub for the advancement of women through greater technology knowledge. The organization focuses on new tech trends, education, and networking opportunities to take the fear factor out of technology. As a part of their initiatives, Tech Up for Women periodically conducts webinars on various aspects of technology which are attended by large numbers of people following their organization. On Tuesday, April 9th, 2024, from 3:00 PM to 3:45 PM ET, a team from NIKSUN, Inc., the world leader in end-to-end Cybersecurity, Compliance, Network Performance Management (NPM), and Application Performance Management (APM) solutions, will be addressing the Tech Up for Women audience. The joint webinar is entitled “Don’t Be a Victim: Stop Cyberattacks in Their Tracks.”

The NIKSUN team will be led by the President of the company, Mr. Nik Pruthi, Senior Staff Engineer, Mrs. Sehiya Jalaludheen, and Staff Engineer, Dr. Lava Al-Doski. They will be showcasing how organizations from small to large can stop being at the mercy of cyber criminals and instead be proactive about their security posture. The talk will cover several topics, including what has allowed malicious actors to be so successful in bringing down the infrastructure of countless organizations worldwide – even those with

security budgets of \$10M+ – as well as how a complete redesign in the way one does security can completely change the game when it comes to protecting critical assets.

Indeed, this novel approach to ensuring your data, along with that of your customers and suppliers, remains secure was invented by NIKSUN as a means of protecting world-leading organizations such as the U.S. Department of Defense (DoD), Department of State (DoS), and thousands of large enterprises including Fortune 500s. Now, NIKSUN is making this same technology available for the small and medium business in an easy-to-setup, easy-to-use, and extremely affordable offering. It leverages a paradigm shift in cybersecurity technology which unifies various data silos that exist in organizations today for complete, 100% visibility into each and every problem a company may have – whether it be a security intrusion, compliance violation, network or app performance incident, or availability issue.

Check out the webinar by registering for it at:
